JPRO[®] FLEET DIAGNOSTICS

ANNOUNCING THE RELEASE OF JPRO[®] FLEET DIAGNOSTICS v5.0!

With the release of JPRO[®] Fleet Diagnostics v5.0, Noregon Systems continues to be the leader in PC-based diagnostic tools for class 7 & 8 on-highway trucks. Coverage updates for major heavy duty engine platforms and vehicles are included.

Now JPRO[®] Fleet Diagnostics v5.0 offers the ability to unlock the new Ford Medium Duty Commercial Fleet module to cover Ford gas and diesel F-series trucks and E-series vans with OBD-II diagnostic protocols.

With the combination of JPRO[®] Heavy Duty Fleet and Ford Commercial Fleet software applications, you can cover OBD-II and J1587/J1939 (HD) protocols for larger Ford vehicles that require both OBD-II and 6 or 9 pin Deutsch connectors.

UNLOCK THE POWER.

NEW VERSION 5.0!

HEAVY DUTY

CLASSES 7 & 8
#11201

FORD MEDIUM DUTY

CLASSES 2 - 6
#11221

ADDITIONAL MEDIUM DUTY COVERAGE:

Classes 2 through 6 add-on coverage modules for:

- GM
- Dodge
- Hino
- Isuzu
- Sprinter

Please note below adapter requirements for Ford Medium Duty App:

Current 'JPro Fleet' customers using the 'DLA+' adapter require only a 16Pin DLC cable and the Ford M/D application CD, 'DLA+PLC' adapters will not work.

The industry leader in PC-based diagnostic tools since 1993.
