JPRO® Fleet Diagnostics Overview

- Allows user to clear all active and inactive fault codes with the click of a button
- Diagnoses all vehicle components in a single application
- Displays fault codes for all components on the databus
- Displays key information about components on each databus using the Component List
- Displays fault codes for all components on the databus
- Automatically connects to all available databuses to see data from all vehicle components
- Facilitates troubleshooting of intermittent problems - when recording the databus, set bookmarks with the press of a key and jump to those bookmarks during playback.
- Automatically displays all component parameters of interest in the Data Monitor. Launches OEM component diagnostic applications in Fault Code Information, Component List, and Diagnostic Message screens.
- Displays selected J1939 Diagnostic Messages, including Freeze Frames, Emissions information, Broadcasts, etc.
- Runs on Windows XP or Vista Business

JPRO® Fleet Service Software Bundle comes complete with:

- JPRO® Fleet Diagnostics software
- JPRO® Fleet Service Portal software
- Meritor WABCO Toolbox software
