New Old Stock Sale Item #3

Bartech 300 Plus

List Price @ \$795.00 / Sale Price @ \$295.00

The Tech300SD is one of Bartech's entry level activation tools. This tool can be upgraded to a Combination style tool at a later time (adding the OBD upgrade kit). Simply purchase the OBD Upgrade kit to convert the tool to a fully functioning TPMS Activation and Scan tool. The Tech300SD is smaller, lighter compared to the400SD and while it functions in a similar manner, the display screen is a bit smaller. The Tech300SD is an economical way to get started in TPMS, and still have the ability to do more later on.
